Based on accounts and theories surrounding Project MONARCH (a alleged, conspiracy-theory-based subset of MKUltra), "Theta" programming refers to a specific type of mind control.

- Theta Programming: Often described in conspiracy literature as "psychotronic" or "PSI" programming, this level is allegedly designed to create "baba" or high-level psychic assassins or operatives with enhanced ESP/telepathic abilities.
- The "Mother" Aspect: In the context of the alleged trauma-based mind control, "Mother" or "The Mother" is sometimes referenced in survivor testimonies not as a literal maternal figure, but as a specific, highly compartmentalized hypnotic alter persona or trigger designed to control other personalities.

Note: Project MONARCH and the existence of specific "levels" like Theta are generally considered conspiracy theories, often discussed by authors alleging survivors of satanic ritual abuse or government mind control projects.

In the context of the Project Monarch conspiracy theory—an alleged sub-project of the CIA's MKUltra mind control program—the terms "Theta" and "Mother" refer to specific layers of mental programming and archetypal personas assigned to victims.

Theta Programming

Theta is frequently described as "psychic" programming.

- Purpose: According to theorists, this level is designed to utilize "bloodline" descendants of occultists or "Starseeds" to develop supposed extrasensory perception (ESP) or paranormal abilities.
- Mechanism: It allegedly involves inducing theta brainwave states—associated with deep relaxation and REM sleep—to create highly suggestible mental compartments.

The "Mother" Archetype

In Monarch lore, the "Mother" refers to a specific type of handler or an internal "alter" (personality) created through trauma-based conditioning:

- Grand Dame / Mother: Theorists claim that female victims may be programmed into a "Grand Dame" or "Queen Mother" role to oversee other victims or participate in high-level rituals.
- Internal Mothers: Handlers may also program a "dark mother" persona into a victim's subconscious to enforce obedience or self-punishment.

Historical Context: While [Project MKUltra](#) was a real CIA program involving human experimentation, the specific "Monarch" framework—including the Greek-lettered programming levels (Alpha, Beta, Theta, Delta)—originated in the 1990s through the accounts of self-identified survivors like [Cathy O'Brien](#) and [Kathleen Sullivan](#). There is no declassified government documentation verifying the existence of "Project Monarch" or these specific programming designation

Levels of Programming

ALPHA – “general” or regular programming within base control personality; characterized by extremely pronounced memory retention [photographic] along w/ substantially increased physical strength/visual ability. Alpha programming is accomplished through deliberately subdividing the victims personality which, in essence, causes a left brain-right brain division, allowing for a programmed union of L and R through neuron pathway stimulation.

BETA – referred to as “*sexual programming*” — this programming eliminates all learned moral convictions and stimulates the primitive sexual instinct, devoid of inhibitions. “**Cat**” (**Kitten**) **alters** come out at this level. **[this accounts for the pervasiveness of “kitten” or “cat” imagery surrounding models, actors, actresses and musical artists]**

DELTA – known as “*killer programming*”, originally developed for training special agents or elite soldiers (i.e. Delta Force, First Earth Battalion, CIA/Mossad/MI6/KGB, etc.) in covert operations. Optimal adrenal output / controlled aggression is evident. Subjects are devoid of fear; systematic in carrying out their assignment. Self-destruct or suicide instructions are layered in at this level.

THETA – considered “*psychic programming*”. Bloodliners (from multi-generational Satanic families) were determined to exhibit a greater propensity for having telepathic abilities than did non-bloodliners (non-hierarchical). Due to its evident limitations, however, various forms of electronic mind control systems were developed and introduced, namely, bio-medical human telemetry devices (brain implants), directed-energy lasers using microwaves and/or electromagnetic — these are used in conjunction with highly-advanced computers and sophisticated satellite tracking systems.

OMEGA – “*self-destruct programming*”, also known as “Code Green.” The corresponding behaviors include suicidal tendencies and/or self-mutilation [cutting]. This program is generally activated when victim/survivor begins therapy or interrogation and too much memory is being recovered.

GAMMA – Another form of system protection is through “deception” programming, which elicits misinformation and misdirection. **This level is intertwined with demonology** and tends to regenerate itself at a later time if inappropriately deactivated.
